Personal Website

To whom it may concern,

I am writing to express my interest in opportunities that align with my skills and background in Computer Engineering. I am currently pursuing a Bachelor of Science in Computer Engineering at St. Mary's University and am eager to apply my technical expertise and problem-solving abilities in a dynamic, growth-oriented environment.

Educational Background and Skills

My technical foundation includes proficiency in Java, C, Python, and C#, along with experience in Microsoft Office, SolidWorks, and Adobe. My coursework has covered C Programming, Object-Oriented Programming, Calculus, and Physics, complemented by certifications in Microsoft Excel, PowerPoint, Word, and SolidWorks CAD Design.

Relevant Experience

I have completed multiple internships that provided hands-on technical experience:

- City of San Antonio – IT Services Intern (Summer 2024): Recovered and processed 600+ electronic devices, provided technical support for Android and iOS devices, and maintained troubleshooting logs.
- Accenture Federal Services – IT Apprentice (Spring 2024): Deployed Windows laptops, managed 75+ support tickets in ServiceNow, and assisted with software diagnostics and configurations.
- City of San Antonio – Public Works Intern (Summer 2023): Analyzed traffic patterns for 2,000+ traffic lights, programmed and synchronized signals, and supported the transition to cloud-based traffic control systems.

Leadership and Extracurriculars

Beyond technical skills, I have demonstrated leadership and teamwork through my involvement in the Society of Hispanic Professional Engineers (SHPE), the Institute of Electrical and Electronics Engineers (IEEE), and the Unmanned Aerial Vehicle Club, where I serve as a project manager. My experience as a resident assistant and former varsity football captain has strengthened my adaptability, problem-solving abilities, and collaboration skills.

I am confident that my skills and experiences make me a strong candidate for opportunities in software development, IT support, and system optimization. I welcome the opportunity to discuss how I can contribute to your team. Enclosed is my resume for your review. Thank you for your time and consideration. I am available via the contact information below.

Sincerely,
Nicholas M. Galus

Personal Website

Dear Mr. Williston,

My name is Nicholas Galus, and I am a Computer Engineering student at St. Mary's University. I am interested in a summer internship opportunity and eager to apply my experience in Python, C, Java, and C# in a software development role.

In high school I took AP Computer Science Principles in high school, where I built a strong foundation in Python. More recently, I worked on an autonomous vehicle project, utilizing a Raspberry Pi to integrate image processing with real-time motor control using C.

Beyond academics, my internships have provided hands-on IT and engineering experience. At the City of San Antonio, I collaborated with traffic engineers to help maintain 1,500+ traffic signals. At Accenture Federal Services, I provided helpdesk support, managed software deployments, and handled IT troubleshooting.

I've attached my resume and would appreciate the opportunity to discuss how I can contribute to your team this summer. Thank you for your time—I look forward to your response.

Best regards,
Nicholas M. Galus

Personal Website

Dear Hiring Manager,

My name is Nicholas Galus, and I am a Computer Engineering student at St. Mary's University. I am interested in opportunities at JCB where I can apply my skills in C, Python, Java, C#, and embedded systems in a dynamic engineering role.

My background includes developing an autonomous vehicle using a Raspberry Pi, where my team programmed it to track reflective tape with a webcam and integrate image processing with real-time motor control. I also have experience in 3D printing, hardware design, and robotics, applying software solutions to real-world engineering challenges.

Through internships, I've gained hands-on experience in IT and engineering. At the City of San Antonio, I worked with traffic engineers to analyze and maintain 2,000+ traffic signals. At Accenture Federal Services, I managed IT deployments and helpdesk support, troubleshooting software issues and utilizing ServiceNow.

I've attached my resume and would appreciate the opportunity to discuss how I can contribute to your team. Thank you for your time—I look forward to your response.

Best regards,
Nicholas M. Galus
