CITY OF SAN ANTONIO — TEXAS —

PUBLIC WORKS

September 26, 2023

Subject: Reference letter for Nicholas M. Galus, Jr.

To Whom It May Concern:

Nicholas M. Galus Jr. served as our high school intern in the summer of 2023. Throughout his approximately two months with us, he participated in detailed observation, research, and organization of data related to the nearly 1,500 traffic signals managed by the City of San Antonio.

Nicholas was a dedicated and hard-working young man within approximately two months he spent with us. He is a tremendously intelligent and self-motivated student who never shied away from any task presented to him.

Nicholas aided the team in reviewing traffic count data, citizen inquiry data, engineering design concepts, and traffic signal operations data. He quickly learned our processes and the theories behind our engineering processes to diligently assist us in organizing and updating our files and processes.

At the conclusion of Nicholas' internship, he provided our team with valuable inventories of design standard examples. He presented to the team his efforts and learning experiences. He accomplished all his tasks with the professionalism and diligence of someone far beyond his age.

It was an absolute pleasure for the Transportation Systems Management & Operations team to host Nicholas during the summer of 2023, and we hope to see him back next summer as well. He would be a tremendous asset to any group or institution he joins.

If you need any additional information about Nicholas, don't hesitate to contact me at 210-207-4540.

Sincerely,

Bianca Thorpe, P.E.
